ALL SCHEMES ARE ACCREDITED EN ISO IEC 17043:2010

LabService Analytica as InterCinD Division is Accredited ISO/IEC 17043:2010.

The Accreditation certifies the technical competence of the organization to the scope detailed as reported in Accredited Schemes details.

The InterCinD is organized in conformity with international guidelines UNI CEI EN ISO/IEC 17043:2010, including the statistical analysis of data for evaluating laboratory performances through the z-scores (accuracy) and measures of dispersion (precision) in conformity with international guidelines ISO 13528:2022.

InterCinD offers **Accredited Proficiency Tests** for the determination of **PCDD/F, PCB-DL, PCB-NDL, PCB-ICES6,** in **Environmental, Industrial, Food/Feed materials and water**; and also PT for **ODOR OLFACTOMETRY (EN 13725)** and **PFAS** determination.

InterCinD aims to develop the quality methods and to support Analytical Laboratories in testing their performance with real endogenous contaminated samples (not spiked) and on request, is also available to offer **Performance Validation Service** on **InterCinD** Materials.

Essence of **InterCinD** are the materials used, **REAL MATRIX** available in **NATURE**, prepared and characterized according to the international guidelines for the production of reference materials.
Please consider that some activities are subcontracted (Sample Preparation, Homogeneity and Stability Testing) in any case the PTP is responsible to the participants for the subcontractor's work, except in the case where a regulatory authority specifies which subcontractor use.

DETAILS FOR PARTICIPANTs INTERCIND PTs (SEE IO01P FOR EACH SCHEME)

Dear InterCinD Participant:

Thanks a lot for your Interest in InterCinD PTx.

a) InterCind ask to every participant Lab to manage PTx samples as the majority of the routinely tested samples
b) The factors that could influence the testing or calibration of PTx items are limited to the method of sample preparation or analysis you adopt in your Lab
c) The PTx scheme does not require particular procedures for preparing or conditioning the items excepting form what reported on Operative Instructions (IO01P) for each Scheme.
d) The PTx items are collected as real samples (environmental and industrial or food-feed) and the contamination level is the one they have in their original environment. They should be handled following the routinely safety requirements of your lab and Country
e) Considering the PTx items, no particular requirements about environmental conditions are specified
f) Please dispose of material residues as waste, following your Country regulation.

The PT follows performance criteria as defined in EN 13725:

- "r" precision under repeatability and "A" accuracy.

These values will be calculated for both Butyl Alcohol and THT considering the consensus value as the geometric mean.
For a number of participants less than 12, the test is not accredited, and the value assigned is considered with the value declared by the manufacturer accompanied by the measurement uncertainty declared in the certificate.
The gas will NOT be a certified reference material.
