DETAILS FOR THIS EN ISO IEC 17043:2010 ACCREDITED EDITION:

The PT follows performance criteria as defined in EN 13725:

- “r” precision under repeatability and “A” accuracy

These values will be calculated for both buthanol and THT considering:

In this edition InterCinD will provide 1 buthanol bottles at 2 different concentrations (total 10 bottle 1,6 lt at 40 bars)

Ref ISO 13528, the PTP will calculate also the z-scores values for participant Labs, for both gases.

If the number of participant Labs will be higher than 12 valid data set, a consensus value will be calculated as per ISO13528 and it could be compared to the Assigned values will be the value that results from analytical homogeneity test

Otherwise, the Assigned values will be the value that results from analytical homogeneity test.

Ref THT study, from laboratories which show compliance concerning A and r on 1-butanol, a robust mean of THT results will be calculated.

Based on this value, a z-score evaluation will be applied too

The z-score evaluation is based on ISO 13528 and ISO 17043 that consider the following range of evaluation:

$ z \text{ o } z' \leq 2$	satisfactory
$2 < z \text{ o } z' < 3$	questionable (check performance and method)
$ z \text{ o } z' \geq 3$	not satisfactory

DETAILS FOR PARTICIPANTS INTERCIND PTs

(see IO01P FOR ODOR SCHEME AND IO04OPT)

Dear InterCinD Participant:

Thanks a lot for your Interest in InterCinD PTx.

- InterCind ask to every participant Lab to manage PTx samples as the majority of the routinely tested samples
- The factors that could influence the testing or calibration of PTx items are limited to the panelist employed in the analysis
- The PTx scheme follows the general requirements of EN 13725:2003, and we ask to every lab to follow the Instruction reported in IO04 (Sample Handling) that will be sent with the bottles.

- d) The level is the one reported on the bottles (≤ 200 ppm for 1-butanol and $\leq 1,5$ ppm for THT) and they should be handled following the routinely safety requirements of your lab and Country
- e) Considering the PTx items, no particular requirements about environmental conditions are specified, except the usual conservation: far from sunlight at a temperature between 20-25 degree, for every other details please follow EN13725 requirements
- f) Every sample SET is 5 bottles for each concentration of n-butanol and 3 bottles for THT.
