DETAILS FOR THIS EN ISO IEC 17043:2010 ACCREDITED EDITION:

The PT follows performance criteria as defined in EN 13725:

- "r" precision under repeatability and "A" accuracy

These values will be calculated for both Butyl alcohol and THT considering:

In this edition InterCinD will provide Butyl alcohol gas cylinders at 2 different concentrations (total 10 gas cylinders 1,6 lt at 40 bars)

For THT, if the number of participants is less than 12, the consensus value and uncertainty will be equal to that relating to the formulation (certificates) of the samples, otherwise it will be calculated as the consensus value and the assessment is processed as ISO 13528, from laboratories which show compliance concerning A and r, a robust mean of THT results will be calculated.

Based on this value, a z-score evaluation will be applied too

The z-score evaluation is based on ISO 13528 and ISO 17043 that consider the following range of evaluation:

$ z \text{ o } z' \leq 2$	satisfactory
$2 < z \text{ o } z' < 3$	questionable (check performance and method)
$ z \text{ o } z' \geq 3$	not satisfactory
